

**SE 216 – SOFTWARE PROJECT MANAGEMENT
STAKEHOLDERS DOCUMENT**

PROJECT NAME: A Centralized Platform for Educational and Career Opportunities

GROUP MEMBERS: Kaan DÖNMEZ ,Hilal Seray ORTAN,Baran Deniz AYDIN,Salih Batuhan ŞENER,Doruk YAŞAR,Selin TAY,Ömer ŞEN

#	STAKEHOLDER	DESCRIPTION
	End Users (Students & Young Professionals)	In case of project success, end users benefit from easier access to opportunities and personalized recommendations. In case of project failure, they may face difficulty finding relevant opportunities and miss important deadlines.
	Universities and Educational Institutions	In case of project success, institutions gain wider visibility and reach a larger audience of students. In case of project failure, they may lose a valuable promotion channel and struggle to attract applicants.
	Companies and Employers	In case of project success, companies can efficiently access a larger pool of qualified candidates. In case of project failure, they may face difficulties in reaching suitable candidates and increased recruitment costs.
	Platform Administrators	In case of project success, administrators can manage a scalable and efficient system with high user satisfaction. In case of project failure, administrators may face system inefficiencies and loss of user trust.
	Development Team	In case of project success, the development team gains experience, recognition, and career growth opportunities. In case of project failure, the development team may encounter reputational damage and wasted effort.
	Government and Regulatory Authorities	In case of project success, authorities benefit from a compliant and transparent digital ecosystem. In case of project failure, non-compliance risks may lead to legal issues and regulatory concerns.
	External Content Providers	In case of project success, content providers gain increased traffic and visibility for their opportunities.
