

SE 216 – SOFTWARE PROJECT MANAGEMENT
PROJECT RISKS DOCUMENT

PROJECT NAME: A Centralized Platform for Educational and Career Opportunities

GROUP MEMBERS: Kaan DÖNMEZ ,Hilal Seray ORTAN,Baran Deniz AYDIN,Salih Batuhan ŞENER,Doruk YAŞAR,Selin TAY,Ömer ŞEN

LIKELIHOOD RANK	RISK DESCRIPTION
1	Inconsistent Data Sources : Data from different sources may be incompatible or inconsistent.
2	Duplicate Detection Complexity: Same opportunity appears differently across sources, making deduplication difficult.
3	Opportunity Normalization Failure : Data cannot be standardized into a common usable format.
4	AI Recommendation Inaccuracy: The AI system suggests irrelevant opportunities, reducing personalization effectiveness.
5	Notification System Failure: Users do not receive deadline alerts and miss important opportunities.
6	Performance & Scalability Issues: System slows down under high load, negatively affecting user experience.
7	User Profile Misconfiguration: Incorrect user input leads to poor recommendation quality.
8	Duplicate Listings: Same opportunity appears multiple times, harming user experience.
9	Incorrect Opportunity Matching: System may incorrectly merge different opportunities.
10	Review System Abuse: Users may submit misleading or false reviews.
11	Data Privacy & Security Breach: Leakage of user data leads to trust and legal issues.
12	Auto Health-check Failure: System uptime drops due to failure in monitoring and auto-restart mechanisms.
